

Gelderse Poort

Our camping is located in the middle of the nature reserve De Gelderse Poort. This area is to be found where the river Rhine enters our country and divides into the rivers Waal and Lower Rhine.

Beautiful view

The area consists of river forelands and polders with rustic little dikes from which one can enjoy this unique ambience.

The whole is surrounded by the push moraines of the areas Montferland, Arnhem (the Veluwe) and Nijmegen. The area of the Rijnstrangen (blind river-channels of the Rhine) is a part of all this and is embedded between the Rhine and the Old Rhine.

The Oude Rijnstrangen (the blind river-channels of the Old Rhine)

The blind river-channels of the Old Rhine extend from Spijk on the German border to the water pump station Kandia just beyond Pannerden.

De blind river-channels are the obsolete waterways through which the Rhine flowed in the distant past.

Due to the digging of the Pannerden Canal the present-day course came into existence.

Location

The campsite is situated in the outer area of the beautiful little village Aerdt in the municipality of Rijnwaarden (consisting of the villages Aerdt, Herwen, Lobith-Tolkamer, Pannerden and Spijk) just a few kilometers away from the wetland recreational area De Bijland (300 ha) and the border between us and our eastern neighbours.

Cycling and hiking

Delightful cycling and hiking tracks enable you to enjoy this extraordinary environment, also cross-border. The long distance hiking paths Pieterpad and the LF 3 Hanze route are nearby.

In the vicinity
